

PASREG 2010

PROCESSING AND APPLICATIONS OF SUPERCONDUCTING (RE)BCO LARGE GRAIN MATERIALS

Table of Contents

- PASREG Program and Abstracts
- PDF Files of PPT Presentations
 - ❖ Welcome
 - *Herbert C. Freyhardt*, Welcome 000
 - ❖ Session A: Innovative Applications
 - *B. Holzapfel*, SupraTrans – A Pilot Superconducting Levitation System for Transportation 001
 - *Y. Arai*, Levitation Properties of Superconducting Magnetic Bearing Using Superconducting Coils and Bulk Superconductors 002
 - *N. Koshizuka*, The Superconducting Magnetic Bearings and Magnetic Clutches for Flywheel Energy Storage 003
 - *J. R. Hull*, Concepts for Using Trapped-Flux Bulk HTS in Motors and Generators 004
 - *F. N. Werfel*, Large-Scale HTS Bulks for Magnetic Applications 005
 - *Maglev ATZ-R Movie*
 - *L. Bromberg*, Stellarator Configuration Improvement Using High Temperature Superconducting Monoliths 007
 - *M. O. Rikel*, Melt-Cast Bi-HTS for Fault Current Limiting Devices 008
 - *J. Sarrao*, Transforming the Grid with Superconductivity 009
 - ❖ Session B: Innovative Applications & Processing
 - *M. Izumi*, Materials Process and Machine Applications of Bulk HTS 010
 - *A. Wongsatanawarid*, Multi-domain Bulk Y-Ba-Cu-O with Artificial Holes for Non-Contact Torque Transfer Applications 011
 - *N. Hari Babu*, Process Developments in Bulk (RE)BCO Bulk Superconductors 012
 - *K. Iida*, Cost-Effective Processing: Recycling of Large Single Grain Gd-Ba-Cu-O/Ag Bulk Superconductors 013

- *M. Muralidhar*, Novel Seed Applicable for Mass Processing of LRE-123 Single Grain Bulks 014
- *M. Tomita*, Development of Compact, Lightweight, Movable Permanent Magnet System Based on High Temperature Bulk Superconductors 015

❖ Posters

- *B. Vanderheyden*, Improving the Performance of Trapped Field Magnets Made of Drilled Bulk High-Temperature Superconductors by Filling the Holes with a Soft Ferromagnetic Material 016
- *J.G. Noudem & T. Prikhna*, Development of Textured YBaCuO Bulk with Artificially Patterned Walls 017
- *L. Bromberg*, Hyperconducting Joints Using HTS Powders 018
- *J.-F. Fagnard*, Study of the Magnetic Shielding Performance in Relation to the E(J) Characteristics of Melt Cast Bi-2212 Tubes under DC Axial Magnetic Fields 019
- *T. Oka*, Novel Magnetizing Method for Permanent Magnet Using Static Magnetic Field Generated by HTS Bulk Magnet 020(see 033)
- *Z.H. Xu*, Non-Destructive Measurement of Critical Currents and E-J Characteristics in Cylindrical (RE)BCO Bulk Superconductors 021

❖ Session C: Processing & Optimization

- *H. Ikuta*, Growth of Melt-Textured (LRE)-Ba-Cu-O by Cold Seeding Using Sm123 Thin Film as Seed Crystal 022
- *P. Diko*, Influence of Post-growth Thermal Treatments on Critical Current Density of TSMG YBCO Bulk Superconductors 024
- *Yunhua Shi*, Recycling of GdBCO-Ag Single Grain Bulk Superconductors 025
- *H. Seki*, Effects of Reinforcement with Fe-Mn-Si Shape Memory Alloy Ring on Mechanical and Magnetic Properties of Bulk Y-Ba-Cu-O Superconductors 026

❖ Session D: Characterization & Pinning

- *R.-P. Sawh*, Enhancement of Critical Current in Large Grain YBCO Superconductor with Nanometer-Sized Dopants 027
- *Ingann Chen*, Control of Pinning Mechanism in Single Domain YBCO Bulk by Morphology Controlled ZnO Dopant 028
- *K. Tsuzuki*, Improvement of Flux Trapping in Gd-Ba-Cu-O Bulk Using Magnetic Particle 030
- *T. A. Coombs*, Magnetization of (Re)BCO Bulks by the Flux Pumping Method 031

- *R.-P. Sawh (for R. Weinstein)*, Measurements of Flux Pumping Activation of Trapped Field Magnets 032
- *T. Oka*, Novel Magnetizing Method for Permanent Magnet Using Static Magnetic Field Generated by HTS Bulk Magnet 033
- *P. Vanderbemden*, Magneto-Thermal Phenomena in Bulk Melt-Processed (RE)BCO Superconductors Subjected to Large Alternating Magnetic Fields 034
- *J. Meen*, Wavelength-Dispersive Spectrometry Analysis of YBCO 035
- ❖ Session E: MgB₂
 - *S.-I. Yoo*, Enhanced Flux Pinning of SPS-Processed MgB₂ Bulk Superconductors 036
 - *T. Prikhna*, MgB₂-Based Materials Synthesized Under High-Pressure 037
 - *A. Patel*, New Fully Superconducting Hybrid Bearing Concept Using the Difference in Irreversibility Field of Two Superconducting Components 038
- ❖ Session Summaries
 - Session A: Innovative Applications; *M. Strasik*
 - Session B: Innovative Applications & Processing; *D. Cardwell*
 - Posters; *K. Marken*
 - Session C: Processing & Optimization; *R.-P. Sawh*
 - Session D.1 (Friday): Characterization & Pinning; *H. C. Freyhardt*
